DETAILED ACTION

1. Application's cancellation of claims 1-42 and 47-61 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 43-46, 70, 71, and 74 are rejected under 35 U.S.C. 102(b) as being anticipated by Wiesenberger.

Wiesenberger shows an apparatus comprising an atomizer, wherein the atomizer comprises a body portion, wherein the body portion comprises a gas aperture, an annular gas cavity 81 receiving a flow of gas from the gas aperture, an annular gas nozzle 84 receiving the flow of gas from the gas cavity, wherein a bulk of the flow of gas flows in a first direction through the gas aperture, a bulk of the flow of gas flows in a second direction through the gas nozzle, and the first direction is substantially orthogonal to the second direction (see Figure 6). The atomizer further comprises a resonator 85 spaced apart from the gas nozzle as recited in claim 44 and the body portion comprises a liquid inlet disposed at a marginal region of the body portion, an annular liquid cavity 85 receiving a flow of liquid from the liquid inlet, and a liquid outlet receiving the flow of liquid from the annular liquid cavity as recited in claim 45, and wherein the liquid outlet delivers the flow of liquid to an atomization region 66, 76, and 68 that is disposed proximal to the gas nozzle as recited in claim 46. The gas

composition as recited in claim 71 is a matter of intended use. The device can also be used for fire suppression in which fire detection devices are known to be a critical part of fire suppression systems.

Allowable Subject Matter

4. Claims 62-69, 72, and 73 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 75-93 are allowed.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Fuglistaller et al. is pertinent to Applicant's invention.
